

Programs & Curricula

Associate of Applied Science in Business Office Administration

Description

The purpose of this program is to prepare individuals to perform tasks related to the management of marketable skills and career advancement in various areas of business, industry, and health offices. Students will receive training in office technology, software and hardware skills, customer service, and strong work-place skills required for success in the workplace.

Program Learning Objectives

1. Demonstrate competence in a core set of skills including customer service, keyboarding and formatting, computer literacy, English, mathematics, and general office skills.
2. Compose and produce appropriate business documents and written communications.
3. Demonstrate a working knowledge of word processing, spreadsheet computer applications, and other business machinery.
4. Demonstrate working knowledge of business and medical terminology as well as various office procedures including insurance billing and coding.
5. Demonstrate knowledge of and apply specific accounting principles as appropriate.
6. Demonstrate a general understanding of a business model and entrepreneurship spirit in a capitalistic economy.
7. Communication Skills - Develop, interpret, and express ideas and information through written, oral and visual communication that is adapted to purpose, structure, audience, and medium.
8. Critical Thinking Skills - Gather, analyze, synthesize, evaluate and apply information for the purposes of innovation, inquiry, and creative thinking.
9. Empirical and Quantitative Skills - Apply mathematical, logical and scientific principles and methods through the manipulation and analysis of numerical data or observable facts resulting in informed conclusions.
10. Personal Responsibility - Identify and apply ethical principles and practices to decision-making by connecting choices, actions and consequences.
11. Social Responsibility (Civic and Cultural Awareness) - Analyze differences and commonalities among peoples, ideas, aesthetic traditions, and cultural practices to include intercultural competence, knowledge of civic responsibility, and the ability to engage effectively in regional, national, and global communities.
12. Scientific Reasoning - Apply scientific concepts to explain the natural world.

Course Descriptions

ACCT 1100 Principles of Accounting, Part I

This course is designed to teach fundamental accounting principles for a service business. It is intended to provide a foundational knowledge of accounting as opposed to advanced understanding. Upon successful completion of both Principle of Accounting Courses, students will be adequately prepared for entry level bookkeeping positions.

ACCT 1200 Principles of Accounting, Part II

This course is designed to be a continuation of ACCT 1100 expanding upon fundamental accounting principles specific to accounting for Cash and Payroll and accounting for a Merchandising Business. It is intended to provide a foundational knowledge of accounting as opposed to advanced understanding. Upon successful completion of both Principle of Accounting Courses, students will be adequately prepared for entry level bookkeeping positions.

ACCT 1250 Payroll Accounting

This course is designed to introduce students to payroll accounting in today's complex environments and focuses on applicable laws, technology advancements in the administration of payroll functions, and with tax withholding responsibilities.

ACCT 1500 Computerized Accounting

This course provides an integration of accounting principles and methods with modern computer software. Simulation emphasizes a hands-on approach to setting up an accounting system, completing an accounting cycle, accounting for payroll, and analyzing financial statements.

BADM 1050 General Business Administration

A survey of business, introducing the major operations of a business, including production, marketing, finance, and management. The course also examines the economic, social, and political environment of business and prepares the student for further collegiate education in business.

BIOL 1010 General Biology I

This course introduces non-majors to science through a study of the basic principles of biology and will focus on the unity and diversity of life. The topics will include biological chemistry, metabolism, cell biology, molecular biology, genetics, evolution, and ecology.

BOTH 1120 General Body Structure

Identification of the organs and basic functions of the human body and disorders as it relates to each system with medical terminology integrated with each body system. Analyzing and combining prefixes, root words, and suffixes to spell, use and pronounce medical terminology correctly and recognize medical terms is included in the course. Medical abbreviations are also included.

BOTH 1210 Administrative Procedures for Medical Office

This course is a discussion of the components of effective client/staff communication, both verbal and nonverbal. Beginning front office activities in a medical office such as scheduling, insurance, billing, using, and maintaining office equipment, legal and ethical issues in the medical office, maintaining patient records, and patient/client education methods are covered. Practical application activities are integrated throughout this course.

BOTH 1230 Insurance Billing

This course covers discussion of the types of health insurance, insurance claims procedures and instruction in the application of the current version of the International Classification of Diseases, 2001, Revision, Clinical Modification (ICD-9-CM) Classification System and Current Procedural Terminology (CPT). Students may participate in selected clinical sites as part of this course, if available.

BOTH 1240 Coding

This course covers the importance of accurate coding for the success of any healthcare facility or provider's office because correct coding determines proper processing of claims for reimbursement.

BOTH 1300 Medical Office Terminology

This course introduces the vocabulary, abbreviations, and symbols used in the language of medicine. Emphasis is placed on building medical terms using prefixes, suffixes, and word roots. Upon completion, students should be able to pronounce, spell, and define accepted medical terms.

BOTH 2110 Medical Office Transcription

This course covers principles of medical transcription along with practical application and usage of medical forms, reports and case studies with integrated medical terminology and medical keyboarding. Students may participate in selected clinical sites as part of this course, if available.

BUSE 1100 Business English

This course includes a concentrated and intensive study of English grammar and usage as applied to business documents and applications, a study of concepts and methods of business communication, and engaging the student with practice in the various modes of business communication (e-mails, memos, etc.).

BUSF 1023 Entrepreneurship

This course is designed to introduce the student to early development, planning, formation, and management of entrepreneurial ventures. Emphasis will focus on fundamental business concepts; start-up team issues; entrepreneurial thinking and creativity, business plan creation; life cycle of opportunity and assessment; feasibility analysis; business implementation; new product introduction; and seeking funds.

BUSF 1050 Personal Finance

Instruction in budgeting, credit, investment, insurance, real estate, and other areas of money management. A study of the methods of financing, including sources and applications of funds, net worth statement analysis, financial planning, cash flow statement analysis, stocks, bonds, mutual funds, time value of money, and basic risk analysis.

BUSI 1013 Introduction to Management

The roles, functions, and styles of managers, specifically principles and procedures for planning, organizing, leading, and controlling organizations, are addressed in this introductory course. Emphasized is the practical application of theory to reality. Students focus on the techniques, tools, and methods of managerial decision making and employee motivation, as well as consider the effects of ethical leadership and management practices on an organization.

BUSM 1050 Business Math

A study of various business-related mathematical processes, principles, and techniques used to solve business problems on the electronic calculator.

CPTR 1002 Computer Literacy & Applications

This course is an introductory study and application of computer system components and operating system environments. Internet concepts, electronic mail, and core components of word processing, database management, spreadsheets, and presentation software will also be addressed.

CPTR 1320 Spreadsheets

This course focuses on the fundamentals of producing spreadsheets and graphs.

CSRV 1000 Customer Service

This course is intended to help participants' progress from learning about themselves, to learning how to relate to their internal customers as well as their external customers in the workplace.

ENG 1015 English Composition

This course focuses on drafting and revising academic writing assignments that will guide you through the research process in preparation for writing one longer persuasive research essay. All writing assignments emphasize the importance of writing processes, such as brainstorming, drafting, and revising.

HIST 1010 Western Civilization I

This course is surveying the periods from to the earliest cultures to 1648 and includes the contributions of the Romans and the Christian church, feudalism and rise of national states and ends with the Renaissance and Reformation.

HIST 1020 Western Civilization II

The purpose of this course is to provide an overview of the major political, social, and economic transformations that have shaped the world from the period following the Reformation to today. They will look closely at the ways in which societies and individuals have responded to changes through time.

HIST 2010 American History I

A survey of American history through the pre-Columbian, colonial, revolutionary, early national, slavery and sectionalism, and the Civil War/Reconstruction eras.

HIST 2020 American History II

This course is a survey of American history beginning after reconstruction including industrial expansion and related problems, imperialism, World War I and aftermath, depression and New Deal, World War II, and the area of growth and expansion since the war.

INCT 1900 Web Page Design

This course allows the student to develop a working knowledge of a website programming software package. The student will plan, design, build, and publish an easy to navigate web site. Web authoring software packages like Adobe CS6 or other popular applications will be introduced to build web sites and enhance skills. Various web authoring languages for Client-side like HTML, CSS, JavaScript will be introduced.

INTE 1200 Operating Systems

This course introduces operating system basics with the intent of giving students a deeper understanding of various operating systems. Operating systems covered include Windows 7 through Windows 10 desktop operating systems, Windows Server, UNIX/Linux, and macOS. Students will learn some networking basics and information for how to create mixed environments.

INTE 1210 Introduction to Programming

This course is designed to teach students the basic and advanced topics in personal computer operating systems. It is a hands-on study of computer operating systems through skills-based, project-oriented instructions using the most popular operating systems used in business and industry. Windows 10 and Windows 7 will be the main subject of study. However, other operating systems like Linux and Apple OSX for the Mac will be discussed. The course also prepares students for industry-based certifications. The course includes but is not limited to the following subject areas; Installation, Administration, Optimization, Management and Troubleshooting aspects associated with managing Windows desktop operating systems from standalone to network environments.

KYBD 1010 Introductory Keyboarding

This course is an introduction to basic keyboarding terminology and touch typing. Emphasis is placed on speed, accuracy, and correct techniques.

KYBD 1200 Word Processing

This course covers continued development and application of introductory to intermediate keyboarding techniques combined with basic word processing techniques and functions. Emphasis is also placed on an increase in speed, accuracy, and correct keyboarding techniques.

MATH 1015 College Algebra

Topics from algebra including complex numbers; radical and rational equations; linear and quadratic equations and inequalities, absolute value equations and inequalities; lines and slope; graphs; inverse, exponential, and logarithmic functions; systems of equations and inequalities; conics; applications.

MATH 1300 Contemporary Mathematics

This course is designed as an introduction to topics in contemporary mathematics. Topics will vary but may include problem solving and reasoning, set theory and Venn diagrams, perspective and symmetry in art, graph theory, elementary number theory, optimization, numeracy in the real world, geometry, and apportionment and voting methods.

OSYS 1100 Records Management

This course includes basic records management terminology, procedures, classification systems, electronic and manual storage, retrieval, and disposal, compliance with freedom of information laws and Privacy Act.

OSYS 2530 Office Procedures

This course focuses on understanding the role of the office professional in today's changing office environment. Students learn effective office, human relations, communication, decision-making, and critical thinking skills by completing assignments and live projects. Specific items covered in this course include interpersonal communications, professional presence and success behaviors, stress and time management, work ethics and diversity, current technology, telecommunications, mail and records management, business correspondence, teamwork, meetings and presentations, travel and conference arrangements, and career development.

PHSC 1015 Physical Science I

This course is designed to survey the wonders of the physical universe through a study of kinematics, Newton's laws of motion, rotational motion, fluids, thermodynamics, waves, the solar system, and other key topics in astronomy. Not intended for science and engineering majors.

PSYC 2015 Intro. To Psychology

This course is designed to provide you with an introduction to psychological theory and research. Topics considered include the nature of psychology and its history, research practices, learning and conditioning, developmental psychology, personality, social psychology, psychopathology, and psychotherapy.
